DETAILED ACTION

This application 09/491,389, has been examined. A first action on the merits has been deferred. Claims 1-24 are pending.

Restriction / Election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to placement of a datapath structure, classified in class 716, subclass 8.
 - II. Claims 18-24, drawn to a density map partition, classified in class 716, subclass 7.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions relate to (I.) placement of a datapath structure and (II.) a density map partition and a method for generation of same. The claims for the separate inventions recite separate and distinct features and do not have any relation to each other.
3. Because the inventions are distinct for the reasons given, supra, and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. A telephone call was made to Peter C. Su, 43,939 on or about June 2002 to request an oral election to the above restriction requirement, but the telephonic contact not result in an election being made.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
